

SECONDHAND SMOKE

is the tobacco smoke exhaled by a smoker or from a burning tobacco product.

Secondhand smoke contains thousands of **chemicals**, at least 69 are known to cause **cancer**.

There is no safe level of **exposure** to secondhand smoke.

Brief exposure to secondhand smoke causes **damage** that is known to cause illness and **cancer**.

Using ventilation systems, or opening a window does not eliminate the **harmful effects** of secondhand smoke.

Children exposed to secondhand smoke are a higher risk for **health issues**.

Pets that breathe secondhand smoke are more likely to develop **cancer**.

IF YOU SMOKE: Protect your family, friends and coworkers by keeping your home and car smoke-free.

THIRDHAND SMOKE

is the tobacco smoke residue that remains after a tobacco product has been put out.

After smoke clears, **toxins linger**, which may leave an odor.

Thirdhand smoke **contains chemicals** known to cause **cancer**.

Smoke **residue sticks** to clothing, hair and skin.

Lingering toxins resist normal household cleaning.

Thirdhand smoke **builds up** over time on carpets, walls, furniture, plastic toys and stuffed animals.

Infants and children are **more exposed** to thirdhand smoke because they crawl on the floor and put things in their mouths.

IF YOU SMOKE: Protect your family, friends and coworkers, wash your hands and hair and change your clothes before coming into contact with others, especially infants and children.
